

## Teacher Program Overview & Schedule

### Paws, Claws and Roars – All Years (F-12)

**Program Duration:** 1 Hour

**Location:** Polar Bears Shores

**Minimum Participants:** 10 Students

**Maximum Participants:** 35

#### Program Overview:

This interactive program provides a broad overview of Polar Bear biology and ecology for students of all ages. Students will learn where Polar Bears live, what roles they occupy in their habitat, and how they are equipped to survive in their environment. Specific adaptation covered will address how polar bears move, hunt, protect themselves and maintain body temperature. Students will consider how some human activities are threatening the survival of Polar Bears and will discuss actions that can be taken individually and globally to help with conservation of this species.

This program has been developed to cater for mixed year level groups, providing a general overview on marine conservation and information on marine species/ or specific animals.

#### Additional Information:

*This program is not specially curriculum aligned and is suitable for mixed year levels or groups visiting from various subject areas.*
